Keyboard macro recorder for any computer. KeyMacro is a fast, lightweight and easy-to-use program that lets you create complex and unique automated actions on your keyboard. Keyboard Macro editor KeyMacro lets you record a series of simple and complex keyboard shortcuts as text macros. You can record your actions by using different layers, and these layers are easy to navigate through. It also has the ability to recognize phrases, so you can create single-clicked macro actions and more. The program has a default key mappings window, which means that it's not necessary to edit the configurations file all the time. It's available in two editions: Lite and Pro. KeyMacro features KeyMacro has lots of customizable features such as the ability to record a series of keys, monitor all other applications or record a macro while playing a specific program. You can also edit the commands that get recorded during the recording process. It has a built-in file manager and command line window. You can add a keyboard shortcut to any open file, edit or delete a file, rename a file and more. Some of the supported platforms include Windows 10, 7, 8, 8.1 and Vista. NiteEdit Description: NiteEdit is a simple yet effective text editor for Linux. It's been built with a simple interface to create basic tasks or extend it further with more features. Simple to use NiteEdit is a basic text editor that is designed for Linux users. You can carry out all the editing operations very fast, but you can also use the supported plugins to perform more advanced features. Supports text formats It lets you work with different text formats including simple ones like ASCII and Unicode. Additionally, it supports different encoding types such as ANSI, UTF-8, UTF-16, etc. Supports the

clipboard NiteEdit allows you to copy and paste text from and to the clipboard. You can save a document in the format of your choice on your desktop. File management features There are a number of options that allow you to manage files with ease. Some of these features include creating a new folder, opening, closing and moving a file and more. Sidebar description: The sidebar is a window that is embedded into the main window of the app. It consists of various features including a recently used file list, a file browser, the QuickLaunch tool, etc. Lite Features: 1
