Update your Android Phone with WhatsApp. Download WhatsApp Messenger APK for. Send bulk messages in WhatsApp without Wi-Fi connection. Download today for FREE .Q; Merge Sort C++ I have written a merge sort for my homework and need help with finding the largest and smallest values. I would appreciate your help with this. Thank you. I am trying to find the largest and smallest values in the array. The program is supposed to find the largest value and last number in the array to be placed in the index where the largest value is in the original array. #include #include #include #include using namespace std; void mergeSort(int* array, int size) { if (size array[j + 1]) { temp = array[j]; array
