Q: Bind a ListView to ObservableCollection in Xamarin Forms I am trying to bind a ListView with an ObservableCollection. I am using MVVM, in Android. The code works fine and displays all the items in the ListView (the collection has 20 items), but the buttons in the ListView are not responding to the click events:

```
Code: public class MainPage : ContentPage {
    public ObservableCollection Products { get; set; }
    public MainPage() { this.Title = "Main Page"; LoadViewModel(); ListView lstView = new ListView { ItemsSource = Products, SelectedItem = Products.ElementAt(0) }; Content = lstView; }
    private async void LoadViewModel()
    {
        Products = new ObservableCollection();
        Products.Add(new MainProductItem() { Name = "Article 1", Id = 1 });
        Products.Add(new MainProductItem() { Name = "Article 2", Id = 2 });
        Products.Add(new MainProductItem() { Name = "Article 3", Id = 3 });
        Products.Add(new MainProductItem() { Name = "Article 4", Id = 4 });
        Products.Add(new MainProductItem() { Name = "Article 5", Id = 5 });
        Products.Add(new MainProductItem() { Name = "Article 6", Id = 6 });
        Products.Add(new MainProductItem() { Name = "Article 7", Id = 7 });
    }
}
```
