

KeyMacro is a free and customizable macOS utility that enables you to modify keyboard shortcuts. As of today, the app supports the following editing modes: Keyboard Shortcuts (Custom Shortcuts) Language (Language) Currency (Currency) Date (Date) Keyboard Shortcuts (Custom Shortcuts) With this app, you can create keyboard shortcuts for macOS using a quick and easy GUI, something that can be a real time saver for those users that utilize the macOS operating system on a daily basis. KEYMACRO Functionality: KeyMacro has three main functions. The first and most important is that it provides a feature-packed customization interface for your custom shortcuts. You can define your shortcuts to work with multiple apps, and even group them, and edit the descriptions for each shortcut. You can change the triggering conditions and stop-action options for each shortcut, and even synchronize them with a spreadsheet. KEYMACRO Features: The second function of the app is that it's provided in the form of a mac app, and this means that there are fewer possibilities for third-party software to intercept your shortcuts. Finally, you can make your shortcuts universal, something that is not possible with third-party programs. In addition to the features mentioned above, there are more that you can find in the official website of this utility. KEYMACRO Pricing: KeyMacro is a free utility that, unlike the aforementioned resources, does not provide you with a few shortcuts for your favorite apps, nor does it provide you with extra features. This is why we can recommend it as a great option for those of you looking for a quick and easy way to customize your custom shortcuts. You can find more information and download the app from the official website of this utility. All you need is an internet connection to convert your source file to PDF in just a few seconds with this application. Multi-page conversion with a single click This little helper is a simple app that lets you convert your files to PDF in just a few seconds, with no more than a single click. Once installed, just double-click the icon and a window will pop-up that includes all your preferences and the conversion of all your files in a single click. In addition to being very simple and convenient, this tool will convert your files in different ways, with the option of double- or single-page previews for each conversion, as well as cc6f4944dd

This course will explore the history and principles of academic ethics, the ethical perspectives that underpin the field, and the nature and causes of ethical problems in undergraduate research. We will consider how academics respond to such problems and whether their choice of action constitutes "unethical" behavior. We will examine a range of ethical issues that arise from the nature of undergraduate research and its relationship to university policies, and consider how various parties can act ethically in research involving undergraduates. The course will be taught in an online asynchronous format, with weekly asynchronous lectures and discussion forums. Course Syllabus and Content Ethics Beyond High School - Academic Ethics and Internet Use The Ethics Beyond High School - Academic Ethics and Internet Use description is here. This course will explore the history and principles of academic ethics, the ethical perspectives that underpin the field, and the nature and causes of ethical problems in undergraduate research. We will consider how academics respond to such problems and whether their choice of action constitutes "unethical" behavior. We will examine a range of ethical issues that arise from the nature of undergraduate research and its relationship to university policies, and consider how various parties can act ethically in research involving undergraduates. The course will be taught in an online asynchronous format, with weekly asynchronous lectures and discussion forums. Online Course Syllabus: Week 1 (1/22 - 1/28) Instructor Asynchronous Lectures: It is anticipated that this course will be taught in an asynchronous format using the Blackboard VLE platform. Discussion forums will be used for class discussion and for course exchange. All course content will be accessible via Blackboard and will be archived on the course website. The lectures will be provided by NMSU professors. Transcripts of the lectures will be made available to all students. Mock Exam: Week 1 (1/28) Student Response (homework) Homework: Students will have 20 hours of free time from 11/28/15 - 12/1/15 to work on their assigned tasks. The following are the deadlines for assignment submissions: Description of your project: In the first week of the course, we will provide you with all the tools and resources you need to develop a project. This assignment is based on this assignment. To help students meet the timeline, each team will be allowed to create their project during the second week. Short blog post (2
