A web-based mixed-method study of the effects of improved care planning for people with schizophrenia in a community mental health center setting. A study was conducted to explore the effects of a web-based, tailored, and multimodal intervention on the experience of care of patients with schizophrenia in a community mental health center. Subjects were randomized into the experimental or control group. The control group used the same online intervention, whereas the experimental group received an additional 5-month intervention that used the unique features of the online platform. The control and experimental groups did not differ in levels of satisfaction with care. The experimental group had significantly more contact with primary care physicians and an increase in the number of patient activation activities. We are staying at Chávez, just three minutes from the beach and walking distance from Coco-a. We are enjoying it immensely and the staff has been extremely helpful and friendly. It's a bit hard to find on the map, but you need to take a left out of Coco-a. The name is Chávez but the town is called Playa or Playa Chávez (Chávez Beach). Be aware of the traffic when leaving Coco-a. We wish we had discovered Chávez sooner. It's a bit hard to find on the map, but you need to take a left out of Coco-a. The name is Chávez but the town is called Playa or Playa Chávez (Chávez Beach). Be aware of the traffic when leaving Coco-a. We wish we had discovered Chávez sooner. We were at Chávez and we booked through Coco-a. We did some research and Chávez looked really good so I went with it and it was good. We have been there 3 or 4 times and the service is good. We live in Atlanta so we travel alot and we have found most of our accommodations from Coco-a. In the future we are going to stay at Española, Nieves, Punta Morena and now Chávez. We were at Chávez with a 2d92ce491b
