android studio How to read login details from firebase database? I am creating app where every user has logged in with some
information. I want to read those details from Firebase database on log in. What should I do? @Override protected void
onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); setContentView(R.layout.activity_main);
btn.setOnClickListener(new View.OnClickListener() { @Override public void onClick(View v) { FirebaseAuth mAuth =
FirebaseAuth.getInstance(); String currentUser = mAuth.getCurrentUser().getEmail(); //Toast.makeText(this, currentUser,
Toast.LENGTH_LONG).show(); Toast.makeText(MainActivity.this, "Werde mit euren Benutzernamen und Passwör

A: Its down or down for any random reason The load time will not be equal for every client, because some clients may have better
connection speed than other clients. So some clients will get faster load time, and some will get slower load time. Server overload If
your server is busy when the load time is taking longer than usual, it may slow down your connection speed. Solution Your ISP may
block traffic from some client's IP to server How can I know which client's IP is blocking traffic? Go to and register. Its free and very
simple to set up When your traffic will be blocked, register with dyndns and set your IP address. Domain name resolution might be slow
when you first access the server. Because DNS is updating itself. How can I know that? Open ping command in command prompt Ping
from command line Enter ping [your-site-name] and wait for the first packet to arrive Open Notepad Write : ipconfig Copy everything
on the result window Paste it on Notepad. Make a note of the ipaddress part. For example : ipconfig Windows IP Connection Result :
Result : Ipv4 Address Result : Then copy that from command line or Notepad Example ping google.com Paste it on a online forum
like Or just use Google Write google search term + search IP Example : Google Write google + ip address Paste it on a online forum
or google search Write your site's name + ip Example + ip How can I share or distribute the site on the web? You can use these
services The first one is free. If you do not want to pay for it. The second one is paid service. But its free trial. You can also host your
own DNS services. Its free. Andrey Burov Andrey Andreyevich Burov (2d92ce491b
