• The Notepad theme for Windows 7 is an art piece based on the Alan Wake game for Xbox 360. • The large 16:9 Notepad is surrounded by a black screen and the usual Windows 7 colour keys. • The medium-sized Notepad and Windows 7 colour keys fit perfectly into the theme. • The small-sized Notepad sits comfortably on the desktop and the Windows 7 taskbar. • All the buttons work perfectly with the keyboard and mouse. Install this Notepad theme with the three different sizes for free Installation instructions: 1. Go to the start menu, and in the search box type “%SystemDrive%”, you should see a folder named Theme. This is your Themes folder. 2. Copy the Theme folder (or whatever name you give to it) to your Documents folder. 3. Drag the folder you copied to your Documents folder to the Windows 7 Theme folder on your computer. If you want a different sized Notepad, drag the folder to the Themes folder on your computer and choose the size of the Notepad you want. 4. If you see the Notepad theme screen, that’s because you’ve successfully installed the Notepad theme. • If you don’t see the Notepad theme screen after installing, then you’ll have to do the steps again to get the Notepad theme installed. All work done by a smart fan I’m not going to explain all the details behind this theme, because it will only bore you and bore me. If you’re interested, though, you can get the full story from the developer’s website: This theme uses: • By Creative Fusion • Microsoft Windows 7 • Notepad • Notepad++ There are a number of alternative Notepad themes available for Windows 7. You can see my Notepad theme collection here: You can also download the whole collection for free, or even download it again for free.
