Now I want to make a loop which outputs the words with the same letters together. But there are some problems. The first loop goes through the letters in the word and outputs them on the screen. I have written a loop which counts all the same letters in the list (which is also a string). I output this count on

A: This is a good site for easy download of matlab 7.9 7.9.0 (R2009b) is what you want IT SEEMS to be a running theme in footballing England right now. Results are in and, having enjoyed some good wins over Azerbaijan and Slovenia, England's home game against Ukraine will represent a step up in quality and prestige in the group. Even if England don't manage to take all three points (which they might not if Chelsea have anything to say about it) then the 3-1 scoreline will not have done much to dispel the image of a team that, whatever England's current domestic form, can cause European clubs much concern in the coming years. The Football Association has made some bold statements about the need for better preparation and recruitment over the years. It needs to be said, though, that in recent years the FA has made more bold statements than bold results. The FA's arrival on the scene only a decade or so ago has been credited with the widespread decline in English football. Between 2000 and 2010, England won just two World Cups and progressed through the group stages in the 2003 tournament but the balance of opinion in the English game is that it was the FA's arrival on the scene that brought about the fall of English football. This is unfair in the extreme. The reality is that the last seven years have seen far more competitive and successful years for English football than have preceded them. The story, as often told, is of the decline of English football from one of European superpowers to a punching-bag for bitter Germans to rub their wounded egos. It doesn't take a great deal of imagination to see the stories being written about this England side. They are on course to win their first major trophy for 45 years. Their Champions League group game against a team that no one had given a chance of qualifying – Ukraine – is the next stop on the road to the semi-final of the competition. But despite the achievements of recent years and the improving skill level of the top English sides, there are some problems. For all the talk of the English side being inexperienced in Europe, it was very experienced players who stuttered in the final stages of the group. Ashley Cole (38 caps), Gary Cahill (19), Glen Johnson (29), 2d92ce491b
