Additionally, AutoCAD can be used to create installation and documentation packages. Features The primary feature of AutoCAD is its ability to create drawings and diagrams. Most drawing-centric CAD systems are also able to perform various editing functions. However, if an editing function is not available, the user must switch to a separate tool. AutoCAD has features that are unique to its purpose. For example, its block- and object-based system of drawing enables the user to quickly and easily represent 3D models or 2D layouts. AutoCAD features a large, carefully developed library of geometric and technical 2D and 3D shapes that can be manipulated and combined using common geometric tools such as the snap, copy, cut, move, and rotate tools. 2-year-old boy dies of his wounds in shock-and-awe attack in Yemen A 2-year-old boy with a bullet wound to the head was killed by his own family in a "shock-and-awe attack" in Yemen, according to a human rights group. Jamal Mahdi, also known as Abdul Nasser, was killed in a remote village in Abyan province in northwestern Yemen early on Thursday, the Amnesty International reported. His father, an Al-Qaeda in the Arabian Peninsula (AQAP) leader, was killed in a drone strike two years ago. "Jamal, who was only 2 years old, had a gunshot wound to the head, and died of his injuries within an hour," Human Rights Watch said in a statement. "His own father killed him because he was suspected of being an Al-Qaeda supporter." Yemeni security forces have been conducting a joint operation with the United States against AQAP and the Saudi-led coalition in the past two years. The attack is the latest example of how civilians are being killed by the coalition forces' air strikes. Jamal's death comes at a time when the US and the coalition have increased their efforts to combat Al-Qaeda by carrying out drone strikes on terrorist bases in Yemen. According to the Amnesty International, the father of the child was in Abyan province between January and May 2015. The report said he was killed as part of the offensive against AQAP in Yemen. In May, Amnesty International said that the US-led coalition forces have killed 600 civilians in their air strikes in Yemen in the last two years.Q: Статический текст Всем привет. Как сделать, чтобы
