Customization Customization is the process of making changes in AutoCAD, allowing the user to customize his or her AutoCAD experience and obtain a look and feel which is unique to that user. Customization allows the user to alter the interface to resemble their own work style. There are a number of different ways to customize AutoCAD, such as: The command bar The command bar is the list of commands, tools and functions found on the menu bar and the

keyboard. It is present on the left side of the screen when the mouse is over the viewport. By default, the command bar is visible. Command bars can be customized by the user and contain various tools, such as buttons to open and close files, select objects and perform operations on a drawing. The command bar can be customized through the menu Edit > User Preferences > Command Bar. Keyboard shortcuts Keyboard shortcuts are sequences of keys which, when pressed in sequence, perform some function within the program. For example, pressing Shift+S on the keyboard will start an outline or spline of the selected object. The keyboard also has a number of shortcuts for most commands,

including: Mouse: Mouse buttons can be programmed with keyboard shortcuts (for example, the right mouse button can be pressed by holding the shift and pressing the F2 key to open the flyout menu for a command).

Additionally, the mouse can be configured to automatically perform a specific command when a certain key is pressed. Tools A tool is a piece of software that adds functionality to AutoCAD or has the ability to work with AutoCAD drawing objects. Tools can add functionality to AutoCAD while it is running, such as text rendering, measuring tools, or a raster image can be used to identify the objects on screen.

AutoCAD Commands AutoCAD Commands are

the command names which, when typed in the command bar, will open a dialog box allowing the user to choose a command to execute. For example, the command to turn a line on the screen by holding the SHIFT key and pressing the "V" key will be called "Select Straight." The command names for the most common commands are printed in the command bar help system. The command bar may also contain several toolbars, a1d647c40b
