The GlobalDict Dictionary is a multilingual Dictionary. The most important features are: – Multilingual dictionary with more than 400.000 translations – Find the translations of any word into the most used and standard languages, as well as into phonetic, dialectal, military, and child versions of those languages. – Finds the most common translations into English and their pronunciations. – Interface, feedback, and support in multiple languages. – Full copyright documentation and suggestions for use. There are two methods to access the

translations: – Translate the word from the context menu. This option is available in the menus for every word. – Show the translations from the result list by pressing the mouse. Translate the word from the context menu Press and hold the mouse button over the word to be translated. A pop-up menu appears. You can use it to perform the same operation as the context menu – translate the word directly into the language you wish to use. The list of translations appears in the background window. Show the translations from the result list Press the space bar or click the mouse button to see the next word. The translations appear in a list in the

background window. English The GlobalDict Dictionary allows you to translate words into more than 400.000 English translations, which is more than any other dictionary program. Chinese The GlobalDict Dictionary allows you to translate words into more than 75.000 Chinese translations, which is more than any other dictionary program. German The GlobalDict Dictionary allows you to translate words into more than 18.000 German translations, which is more than any other dictionary program. German The GlobalDict Dictionary allows you to translate words into more than 18.000 German translations, which is more than any other dictionary program. Japanese

The GlobalDict Dictionary allows you to translate words into more than 17.000 Japanese translations, which is more than any other dictionary program.
