---

restaurant reservations, with details about the reserved tables and attending customers. Being a scheduler utility, users will benefit from a tabbed layout and a central reservations view, accompanied by a calendar for easy time keeping. People will have no issues in handling the application and they might appreciate the colorful and appealing buttons or features. All will be within reach and one will be able to easily enter details about the different tables available for reservations and assign employees or waiters. Keep your restaurant business in working order with this useful organizer tool that offers realtime sharing of the schedule over a network. In addition to offering an easy-to-use interface and plenty of useful tools for scheduling the workload and reservations of a restaurant, the application also provides joint work capabilities. That being said, users can work collectively on their schedule or reservations and are able to share their work with each other, this way avoiding overlaps and increasing efficiency. The application will come packed with a dedicated security module where all the authentication details will be customized prior to using the application itself. As a result of the user-friendly interface, novice users will have no trouble in setting up the server login details. Just like with other software packages from this producer, the application also provides exporting XLS, XLSX, TXT, HTML or XML formats. Good software solution for scheduling your restaurant reservations over multiple PCs. Those who are involved into restaurant business and require a consistent solution for organizing their reservations might appreciate the features of this application. It will provide them with the means to schedule the reservations, with details about tables, assigned employees and attending customers. Because of its increased network sharing capabilities, users will be able to perform their joint work with ease and avoid unnecessary overlaps.
