

The complete guide to making your own vaping liquid: 36 Awesome. In these 36 days, you can just have time to get all the necessary ingredients and start creating. Divide a jar of e-liquid into 36 equal portions. Gather together all the ingredients in the form of new toys or drawings on them. Wrap each piece in pretty paper. A pack of the most soaring way to quit smoking might look like this. I did not find a photo where there would be illustrations or drawings, but this does not mean that they should not be. Use a large sheet of paper with colorful pictures of sandwich sandwiches or a paper mug. If you have access to any of these items, attach them to the container of liquid base. This will reduce the amount of waste. Place the finished craft cigarette in the center of the room. Tie a tag to your smoking accessory that says "I quit smoking. Now I'm just like you." Attach the labels to the battery cover of the heater: "I am a smoker, and now I will be with you, as before." "Oxygen is our friend, now you can breathe freely." And leave vaping for 96 hours. Be careful not to be too patient. Make sure you remember to melt the coconut milk as you experiment! Be sure to grind these ingredients quickly enough. To make it easier to do this, use a mixer bowl. Simply place this bowl in your vape liquid and plug in the mixer. Mix the ingredients for a few minutes. When the mixture is homogeneous, add coconut oil. Lubricate the ceramic handle with oil. When the water has cooled, use a brush to apply several layers to it, according to the manufacturer's recommendations. Turn the vaping lamp back on with a fully vaporized bottom layer of liquid to create smoke. The surface of the liquid should be warm to the touch, and its smell should resemble the smell of a Christmas tree. After a few minutes, heat the liquid with a lighter with a soft flame and a heated heating pad. That's all! With pleasure I will make a company for lovers of such a vape!
