Tags 3 Ways To Get Access To Your Files Remotely How many times have you been faced with this situation: You need to be able to use files on your computer but you're miles away from your home or office computer. At first, you could either download an FTP client and establish an account on your home computer, or you could use a shared network drive to access your files from anywhere. Nowadays, there are other ways to get your files through the internet. File Transfer Protocol (FTP) is a program that you can use to transfer files from one computer to another over the Internet. It's the most common way to transfer files over the Internet, and it's pretty reliable. On the other hand, the File Transfer Protocol (FTP) has a few downsides. You can't control FTP transfers in real-time, and you can't upload files larger than 4GB per transfer. File and Folder sharing is one of the oldest ways of getting your files to your friends, family and colleagues who are using Windows computers. It was never designed to be a replacement for FTP, but it's a great alternative for some situations. Here's how to do 77a5ca646e
