Police arrested an alleged cannibal in Campbell who they believe was planning on using a child victim in the cannibalistic act. "I was so close to coming home," the boy's father told KSWB on Wednesday night. Kirk William Brown was taken into custody after he allegedly cut himself while trying to commit suicide by cop. "We found a knife and he had slit his wrists," said Campbell Police Department Spokesperson Misty Huerta. "He's talking about an attempt of suicide by cop." Brown surrendered to officers, who said they quickly placed him in handcuffs. After taking him to the ground, officers checked his vitals. "We had to be on the scene for safety and we were," Huerta said. Brown admitted to having the knife, but officers said he was confused and was in no state of mind to be able to form the intent to kill himself. "His whole demeanor

What's New In MCSHield?

MCSHield is a simple-to-use program that allows you to protect your USB flash drives against malware, by identifying and quarantining any malicious agents. Reviews 4.6 7,024 total 5 1,857 4 457 3 141 2 47 1 71 Kelsey S., MCSHield user The problem with most other password programs is they don't handle your passcodes. Some steal your passcodes from your clipboard and send them to your email address. They write them to disk too and you can't delete them. MCSHield has an easy to use interface. It has a great filtering system for encrypted files. It gives you the option to quarantine files with or without key files. It will even display your passcode in the quarantine list. It's a very small program. It installs in seconds and I didn't see anything else running in the background. It's very easy to use. But it's a little hard to explain to anyone that doesn't know a lot about technology. MCSHield doesn't completely protect you. It just protects your data. It doesn't remove programs that can steal your passcodes. I've found a lot of issues with some of the virus scanners in the past. For example: I had a virus that used one of the strongest viruses on the market to steal my passwords. When I was cleaning the virus from my computer it deleted my files and my homepage was no longer displayed

System Requirements For MCSHield:

Mac OS X 10.9 or above Intel or AMD processors 3 GB of RAM 64-bit OS Bluetooth controller with ANT+ Dongle Required
The tablet runs on your Mac Connects via Bluetooth to your computer Native support for your keyboard ChromeOS supports Bluetooth keyboards and mice natively. Use your Mac to control your Chromecast. Requires a Bluetooth controller such as the Apple Magic Trackpad. Note: There is no option to buy a Chromecast
