Pitch repeat mode, Auto-detect of target pitch, 5 modes of pitch shift. This plugin allows you to create a pitch shift of 2 to 5 semitones, depending on the setting of the pitch. The pitch can be manually set by pressing the "Shift" key, and selecting the desired pitch with the slider. If no pitch is set, the pitch of the currently selected note will be shifted. When you activate pitch shift, the pitch of all the notes is shifted relative to the original note. For example, if you apply a pitch shift of 2 semitones, the pitch of all notes is increased by 2 semitones. It can be set to shift according to the current state of the keyboard, with a filter, or with a fixed shift value, and with several compensation modes (1d6a3396d6
