Solved: Hello everyone, can someone please give me a link to the best tutorial (free) site that gives a lot of information about applying materials in 3D. I think we all have some 3D printing ideas that can be applied in our lives. It could be something as simple as making plastic containers to hold water bottles. We must all do this. Or it could be something more complex, like making jewelry. It will cost more, maybe much more than plastic storage containers, but it will be worth it. We should all think about this.
