## MultiViewer Crack+ Free X64 [Updated-2022]

The application allows you to open up to 2 documents at a time. This is very useful when you want to have a look at different documents at the same time, for example when you want to compare the results of two processes or when you're reviewing some code.

**File Chooser:** This is the main window that shows you all the files you have, and allows you to open them. You can open up to 10 files at once.

**Opening Options:** Once you have opened a file you can press the menu button to see the other options for that file.

**File Reader:** A window that displays the content of the file opened.

**Options:** You can display the contents of the file in a more easy to read way by using the zoom feature. You can also use different tools to modify the file. You can then save it in different formats. The format of the file is saved at the moment you click on the button. This is done using the type of structure the file has.

**Examples:** The file can be saved in different formats like: PDF, RTF, HTML, TXT, DOC, etc. There are several types of view: Table, Line, Screenshot, Zoomed In, Zoomed Out

If you have multiple documents in the file explorer window the last one will be opened.

**Folder List:** This window shows you the contents of the folders. You can open up to 7 folders. You can also add new folders using the menu. The file explorer shows you all the files and folders you have in the selected folder. The file explorer can open up to 10 files at a time.

**Information:** This window shows you some more information of the selected file. You can also view the file, using any of the windows. It can open PDF files, images, text documents, etc. You can also add notes. An example of notes is given in the image. You can also view all the files in the selected folder. You can also choose to open the files in the current folder. You can also close this window. You can also use the panel to view the files. You can also close this window. You can also choose to open the files in the current folder. You can also close this window. You can also use the panel to view the files. You can also close this window.
