## Best PHP Obfuscator Crack

[Download](#)

Best PHP Obfuscator is a lightweight application whose purpose is to help you obfuscate multiple PHP files in order to protect them against reverse engineering. The purpose of obfuscation is to create a source or machine code that cannot be interpreted by humans. The application does not encode your code but it only scrambles it so that it becomes really difficult to understand. Its purpose is to help you create an obfuscated PHP code while maintaining it valid.

User-friendly layout The clean feature lineup makes it easier for you to discover and tweak the program's dedicated parameters. Additionally, you may check out the log for gathering information about the obfuscation process.

Main features Best PHP Obfuscator gives you the possibility to obfuscate a single PHP file or multiple items that are stored within a user-defined directory. What's more, you are allowed to choose the saving directory, insert copyright comments, exclude files based on filename/path, include subdirectories in the obfuscation operation, copy files to the output destination if they are not PHP items, as well as enter
