OpenStartMenu Crack Latest

OpenStartMenu provides more ways to open the Start menu than using the Start button, Win + A or Ctrl + ESC. In addition to starting the Start menu at the current mouse location, it also starts at a specific position with relative location from the upper left corner of the screen. Command Line Parameters: /[/Value] [/Def] Set the menu to only show the first three elements in the start menu (hit F3 or Ctrl+F3) /hidetaskbar Hide the taskbar /nostartmenu Hide the start menu /screen Start the menu at the given screen position /mouse Start the menu at the given mouse location /mouse - - Start the menu at the given mouse location - all axes /mouse - Start the menu at the given mouse location - relative to the upper left corner of the screen OpenStartMenu Command Line Tips: /hide menu = Hide the "Show all applications" menu /hide taskbar = Hide the Windows button /nostartmenu = No start menu, just the browser /screen = Start menu at the given screen position, starting from the upper left corner /mouse = Start menu at the given mouse location /mouse - - = Start menu at the given mouse location - relative to the upper left corner /mouse - = Start menu at the given mouse location - all axes /mouse - = Start menu at the given mouse location - relative to the upper left corner /mouse - = Start menu at the given mouse location - all axes If you use the "- -" command, then you can also leave the mouse cursor at the top-left corner of the screen, and the start menu will start at the current mouse location. The mouse location can also be set with the "- -" command, or the mouse can be moved outside the screen borders (to the right or left), and the start menu will be offset by that distance. See also:

What's New In?

Simple utility that provides a shortcut to the Start menu and features command lines for additional actions. x86, 64bit: Free bonus: Runs on USB flash drive or removable storage: 17-Jan-2009 OpenStartMenu is a simple Windows utility that provides a shortcut to the Start menu and features command lines for additional actions. It doesn't require setup, so it can be saved in a custom location on the hard disk and directly launched. Otherwise, you can save it to a USB flash drive to run it on any computer with minimum effort and no previous installers. It doesn't need DLLs and doesn't change any settings in the Windows registry. Double-clicking the.exe opens the Start menu. This shortcut can be pinned to the taskbar to open the Start menu when the Start button is not available or the Win key is not mapped for this action. As previously mentioned, several command lines are available for enhancing OpenStartMenu's functionality, and they can be viewed by running the tool with "/?". It's possible to open the Start menu at the current mouse location (/mouse), open it at the mouse location + or - x,y value (/mouse + -[x] + -[y]), or open it at the x,y location relative to the upper left corner of the screen (/screen x y). Although these following command lines are not listed in the program, you can also hide the taskbar (/hidetaskbar) and show it again (/nostartmenu), without having to open the Start menu. OpenStartMenu Description: Simple utility that provides a shortcut to the Start menu and features command lines for additional actions. x86, 64bit: Free bonus: Runs on USB flash drive or removable storage:
