Questions And Answers [Win/Mac] (Latest)

Questions & Answers is a very basic multiple choice quiz creator, but it can be expanded easily. Uses very basic settings in order to keep the size and speed of the program down, some features are not included or are lacking. The program has been developed to keep the menus clean and simple. This version is no longer under the GNU General Public License. Make Changes: In the "Options" tab, click the "EXE File" menu. Click the "Change EXE File Type" menu. Click the "Edit" menu. Select "All Files (*.*)" from the file list. Click the "Open" button. Click "Save As", Type in a name for the new file. Click the "Save" button. Questions & Answers Description: Easily create multiple choice questions, answer them and export them to TXT files. Plays through the questions and also allows you to view the students answers, the maximum number of questions can be changed in the "Options" menu. Checking N/Y: In the "Options" menu, click the "Execute" menu. Click the "Select a file" menu. Click the "Choose a file" button. Click the "Browse" button. Click the "OK" button. Specify a name for the new file. Click the "Save" button. Click the "OK" button. About Us FreeUse Software is an independent software developer that has been working for the last two years on Finnish MVP: Multiple Choice Questions Creator The Finnish MVP is a test that you can do in order to get the software into the magazine "Utilities" Copyright Free Use Software (freeuse-software.com) All rights reserved. by FreeUse Software Question & Answers Multiple choice quiz creator Like any other college student, I am starting to organise my studies by doing practise tests for my final exams. This is a computer based course so I need some way to organize my exam questions, and I want my students to be able to read the questions out loud. So, I've written a quiz package called Questions & Answers, which I have written using Delphi. It can create up to 20 multiple choice questions, and can have an unlimited number of answers for each question. You can change the questions for each exam (perhaps with different answers than the practice exam), and you can change the length of the time allowed for each question. You can also control whether or not

Questions And Answers

Questions & Answers is an easy to use software for creating multiple choice quiz's and playing those quiz's. Was developed as part of my HNC in Software Development, No longer available under the GNU General Public License at the Request of the my Educational Establishment. What's New in the Questions And Answers?

Provides you with four or five (4 or 5) customizable scores and 4 or 5 customizable questions. Questions & Answers allows you to create a set of customized questions. A quiz file can have an unlimited number of questions and answers, providing you with enough questions and answers to create a complete course. An example of a quiz, similar to the one that you will create: File Name: sample.quiz Name: Quiz Example Location: C:\My Documents\QuizExample Apples to Apples is our first quiz. How many apples to give to the baby (1 = 20) How many apples to give to the baby (2 = 30) How many apples to give to the baby (3 = 0) 1.(chosen = 20) 2.(chosen = 30) 3.(chosen = 0) How many apples to give to the baby (1 = 25) How many apples to give to the baby (2 = 50) How many apples to give to the baby (3 = 100) 2.(chosen = 25) 1.(chosen = 50) 0.(chosen = 100) This file is created in winzip, a program available in your computer. You can configure the file name, destination location, and other settings in the dialog window. Your file might have several parts (like the one above) that correspond to the different parts of the questions or answers. A clear example of that in this file is as follows: 2. (She gave him a pacifier.) Files have the following naming conventions: quiz The quiz name .mc The marks file .txt The question file .mcr The marks data (i.e. the numbers of the correct answer) .ans The answer file Greeting: I have successfully created this program and I hope that the community uses this resource to its advantage and provides the best documentation for the program. Where you can find documentation: The program's startup and shutdown messages are located in a file called "Alerts.txt". You can find the program's startup and shutdown messages here.
