Adhesion forces between aqueous and oil phases. The interfacial adhesion force between an aqueous solution and an immiscible oil has been measured as a function of the area of the oil-water interface. A pendant drop tensiometer apparatus was used for this purpose. The oil-water interface was separated from the wettable surface by a thin polymeric film. The interfacial forces were measured by retracting the interface towards the wettable surface until the oil-water interface meets a membrane. The force-area curve was consistent with the prediction of an elastic model. The contact angle of the aqueous phase on both hydrophobic and hydrophilic interfaces was found to be above 90 degrees. A correlation between the contact angle and the relative adhesion force was also found. The relative adhesion was increased by increasing the contact angle.

h a day and now I'm in full-time employment after making zero income for a year. Why? Because I don't consider my art a job and I will not conform to your expectations of what a job looks like. I've had to continue to actively work to provide for myself, because I am in the position that a lot of the people that work full time in this artsy, creative industry are. So as I get ready to move up to the next neighborhood, I will be maintaining this blog. I would love to hear your ideas on how you manage your work life. What does that look like? I would really love to know.

Friday, 6 May 2009 What are you doing? 30.3.09 3pm A break from working. I did go to the library because it was very sunny out and there were no plans for a barbeque so it seemed appropriate. I also went to look at boats at the marina in the sunshine and was pleasantly surprised by the view of the boats from the grassy lawn and the harbour. In the evening I'm going to go see the performance of the Little Shop of Horrors at the local Guildhall.

1 comment: About Me I'm a 36 year old English woman living in Cambridge. I'm married to an Englishman and we moved to Cambridge in 2005 for a year to meet our first English boyfriend, whom we've been together for 5 years and live together. This blog is basically a bit of a diary/journals of our year here. I

Q: Acessar valor de um input filtro em outro jquery Quero acessar um valor de um input em outro. Estou usando uma multipla peça js. O objetivo seria acessar o campo `span input.val` em um outro campo `input`, para checar algum valor ou não. Erro: `Uncaught TypeError: Object function (a,b){return new e.fn.init(a,b,c)} has no method 'val'` A: Você pode adicionar o evento `keyup` ao `input` que quer pegar o valor usando `keyup()`. O método `val()` só funciona no evento `click`, o que faz com que o seu código funcione como esperado. Aqui tem um exemplo funcional: `function fun(){ document.getElementById("ctl01").value = this.value; } input:focus{ border:1px solid #111; }`

Pages Sunday, January 30, 2012 This maitake mushroom, from a local grocery store here, is a fairly large brown mushroom with a juicy texture that tastes like chicken. I don't usually find maitakes that large, but apparently they are fairly common and available in many different places throughout the US. The guy in the store seemed to enjoy it and he suggested that I try this one. This one we ordered by the \$5 price tag, so I don't know what the price would be if they were on sale. I tossed the stem out, then cut off the cap and washed it. It has a mild flavor and the mushrooms aren't flavorless. Unfortunately, when cooked the texture wasn't the juiciest. The stock I used didn't have much of an effect on this and I feel like I overcooked the caps because the mushrooms left the plate a lot more watery than the broth I was served with at the restaurant. Oh well, I guess. The
