To get an idea of just how detailed and authentic the animations are, watch the video below, which was shared by the FIFA Reddit community. Transcript: Narrator: To get an idea of just how detailed and authentic the animations are, watch the video below, which was shared by the FIFA Reddit community. James Nash: I was able to go through some of it, and it's pretty incredible. Here are just a couple of examples. James Nash: Just a couple. This is the difference between the one and the other. If you can see how many hours, not a day but hours. I'd say it's probably at least a couple of days worth. The detail and how accurate the animations are, it's incredible. This is just one example. This is a defender diving at the feet of a striker. You can see how accurate and how detailed it is. Kenny Saief: Yeah. So you can just see how the defender is crouched and how that ball has been slipping in the defenders hand to the striker and then the defender just kind of jumps up and the ball comes off that defender's hand. And you can see how it's like a light bounce and then it's just hitting the striker. And then you see them both crash to the ground. That's just a couple of examples. I mean, you can see how exact the defender is in the dive, the striker is in the dive, and then when they both get back up. James Nash: Yeah. And then just the ease in which that ball comes out of their hand, this is from a defender to a striker. Just to show you, the defender simply sees the striker falling a little bit and, pow, he just hits it with the perfect strike. Omar Ali: And then that's the movement of the defender. And that's the real movement. That's how the defender is actually moving. James Nash: And on the next level, you have the full team. You have the overall teamplay and how the game flows. It's like having a game at the training ground. You have the midfield and forwards, defender, goalkeeper and keeper, and you have the ball in the team's possession. You have the different levels of possession and the transitions from one side to the other. So you can see how a goal comes off the foot of the midfielder, the same exact angle. The
