purpose of this renewal application is to
continue an intensive training program that
has been funded since 1994 and supports
the growth of three postdoctoral fellows per
year (five trainees annually). All five have
primary careers in aging research. This

training program is highly integrated, in that it establishes a bi-directional relationship between the trainees and the Aging Center. The trainees

X86lk Iso.Q: Combining generator.groupby()
and generator.sort() I often need to group a
dataframe by one of its columns or columns
which can take values on multiple levels. For
instance, I may want to group a dataframe
by the surname column, and then sort by
the second level first names. In this
example, the dataframe I have is read into a
list of tuples - with columns being the
surname and the first names. The dataframe
columns represent instances d0c515b9f4
