Publisher: National Marine Fisheries Service Instructions for authors.to the. National and state health care reform in the United States: a review of determinants of success. Since 1995, the United States has undergone major health care reform. The federal strategy at the turn of the millennium was based on the notion that universal access can be achieved through the voluntary market, with the federal government providing a safety net for the

---

most vulnerable, while providing tax incentives to employers to purchase health insurance and to individuals to purchase insurance through their employment. In 2000, Congress passed sweeping legislation that was well received by both the Democratic and Republican parties. The legislation included increased government funding of insurance and other national prevention programs, increased funding for children's health programs, affordable catastrophic insurance, expanded Medicaid for certain segments of the population and re-importation of prescription drugs that are generic in other countries, and new programs to create a 'high-risk pool' for uninsured individuals. The initial results of the US health care system are not uniformly encouraging. Significant coverage gains have not materialised in the universal/guaranteed access market and many aspects of reform need further refinement. On the other hand, legislation remains on the books requiring the federal government to continue to expand Medicaid eligibility and to fund some maternal and child health programmes. The consequences of the legislation, along with the political economy of the new programs, complicate any evaluation of results and add significant complexity to any further reforms. This paper reviews the relative strengths and weaknesses of the two major US models of health care reform and discusses the determinants of their success. There are six key factors that have affected success. (1) Federal Government Support: The federal government must be willing to provide adequate funding and must have an effective and reliable control system to ensure that the funds are expended effectively. (2) Political will: The political
