I've tried looking around, but I can't find any similar problems. You may be able to help? A: Did you manage to get it to work? Try the following: Uninstall all other updates that are related to Java and plugins and download the latest one for each plugin as well. Try installing all updates that are related to Java and plugins. Try to test all third-party plugins and Java versions. If it gets stuck at the same place, try to uninstall Java and plugins and only keep Java 7, then try Java 8 and so on until you find the version that does work. If you can't manage to find such Java version, try updating Java, plugins and firmware to the latest version. After you've figured out which version works, see if it is the latest version. If you manage to install everything fine, make sure to uninstall the Java and plugins, then reboot your device. This invention relates to a gate valve apparatus for a beverage brewing machine. Beverage brewing machines are known in the art. Such beverage brewing machines typically have a brewing chamber in which brewed beverages are produced through a controlled infusion of hot water and ground coffee into a brewer. For such beverages, it is known to provide a beverage brewing machine of the type disclosed in U.S. Pat. Nos. 5,735,306 and 6,503,446 which are incorporated herein by reference. In these beverage brewing machines, coffee grounds are placed in a brewer and heated to a brewing temperature. Water is then introduced into the brewer which mixes with the coffee grounds to form a brewed beverage. As described in the above referenced patents, it is known to provide a beverage brewing machine having a selector valve. The selector valve controls the flow of water from a hot water inlet to a
