AMR-C90 at Amazon.com (Free Shipping on Qualified Orders). You may also contact the supplier for a quote if you wish to purchase your own(s).Q: Extending and overriding Magento 2 Can I override Magento 2 class magento/module-catalog/etc/di.xml? Or there's some special procedure for overriding? A: You can override module files only if it exists in the path src/magento/app/code/ Check the path of your custom module's di.xml file, if it is in the mentioned path, then you can override it. Q: How can I name a point shapefile from a attribute name in QGIS? I have a vector layer in QGIS that I want to edit. I have an attribute that gives the name of the landcover type and I want to name the shapefile from that name. How can I do that? I could give the shapefiles unique numbers and then use field calculator to rename each one, but I don't want to. A: Yes, use the rename tool in Layer > Properties > Labels.
