How to get less to work in netbeans 6 i cant get less to work in netbeans 6 i have installed the less.jar and the program is able to compile and even create the files. But when I try to view the generated file in less i get an error. less is just a system path that points to less and less.cc is one that points to less.cc. A: I had the same problem. I had googled extensively for answers and found out it was a known bug with NetBeans 6. The fix was to add the following to the bottom of the build.xml file that's in the build directory for your project: A: think you want to do it with ant (there are several tutorials around). For example: More info: ant.apache.org - Using Ant to Process Files With Less.js An electric vehicle (EV) becomes more common, EV charging stations that supply electric power for charging the EV are installed in a large number, and the facilities appear in some shopping mall or the like. This makes it possible for a passenger to smoothly charge the EV in a comfortable environment, unlike when charging the EV in a parking lot at a station. That is, the convenience of charging the EV becomes higher when the EV charging station is used. On the other hand, there are many EV charging stations that are set up in private homes, a parking lot of a shopping mall, or the like. A household is where people live together, and may include many guests. For example, a charging station of an EV at home varies depending on whether the EV is used by only a host or by a host and guests. Therefore, if an EV charging station is provided in a
