

More Links = Higher Rankings

Link weight is an important parameter that should be considered in the process of website optimization. It is used by search engines to assign a website a higher status (domain authority). When one website mentions another website and creates a clickable link that takes you to it, this is considered a backlink. It is not merely referencing the website or its web address. Backlinks help search engines determine how authoritative and relevant your site is on the keyword or topic for which you rank. Furthermore, backlinks to your website are a signal to search engines that other external websites are endorsing your content. If your business offers any type of products or services that you sell it would be beneficial for you to turn them into high-quality backlinks from bloggers.
