

## Non Lubricated Plug Valve Supplier in Nigeria

African Valve leads as the top [Non Lubricated Plug Valve Supplier in Nigeria](#). It is a type of industrial valve used for controlling the flow of fluids in pipelines without the need for external lubrication. Non-lubricated plug valves are designed for high-performance applications where tight shut-off and reliable operation are essential. They are suitable for handling a wide range of fluids, including corrosive chemicals, hydrocarbons, and abrasive slurries, in industries such as oil and gas, chemical processing, power generation, and water treatment.

These valves are lightweight and easy to install where space is the matter of concern, they have robust construction which makes them effectively handle fluids in a wide range of applications, they remove the need of lubrication which is harmful for the environment. They effectively manage fluid flow, provide quick operation which makes them widely used in the industry where quick opening and closing of the valve is critical.

In Nigeria, we are the trusted [Non Lubricated Plug Valve Supplier in Nigeria](#), ensure flow control and reliable performance in various applications.

### **Advantages of Non Lubricated Plug Valve:**

- They reduce the need of lubrication which reduce the Maintenance and time
- Provide tight seal and prevent from leakage
- They are constructed using material which makes them robust offer long service life and resistance to wear and tear
- Excellent Sealing Performance makes them widely used in the industries such as oil and gas, chemical industry, power plant
- They are lightweight and easy to instal in the application with limited space

- They need low Maintenance
- They provide quick opening and closing of the valve which makes them widely used in the industry where quick operation is critical

### **Industries:**

- Water Supply Systems
- Irrigation Systems
- Dewatering Operations
- Industrial Pumping Systems
- Chemical Processing
- Water and Wastewater Treatment
- Pulp and Paper
- Power Generation
- Mining and Minerals Processing

### **Description:**

- Body materials: CF8, CF8M, CF3, CF3M, Ductile iron, Wcb, Wcc, wc9, wc6, Alloy 20, SS304, SS316, CF8M, SS316L, SS904L
- Size: 1/2"-14"
- Class: 150 to 2500, PN16 to PN63
- End: Flanged, Socket weld, Butt weld, Screwed
- Operation: – Lever Operated, Pneumatic Actuator, Electric Actuator, Gear operated.
